

OutReach Program4-Department of AI&DS

4. Educating students: Programme on importance of Artificial intelligence and The Future of Learning: Online Education for students held at Kendriya Vidyalaya, Panambur on 23rd & 24th April, 2025

Objectives of the programme:

To promote awareness of emerging technologies and evolving educational methods. Programme aimed at educating, motivating and informing opportunities that help students make informed academic and career choices while encouraging them to think critically about the digital world.

Programme Highlights:

- Interactive seminar on the world of Artificial Intelligence - its applications, opportunities, and the role in shaping the future.
- Session on the benefits and challenges of e-learning, digital classrooms, online platforms and remote education tools.
- Group discussions and sharing sessions - Students spoke about their career interests and views on how technology influences learning.
- A quiz on general concepts added excitement while reinforcing learning.
- Event played a vital role in shaping future-ready students by equipping them with knowledge and confidence to dream big and take the first step toward their goals.
