5. Educating Parents: Awareness Program on Modern education system to parents held in the Residential Area near Kodikal on 30th April 2025

Objectives of the programme:

Programme aimed at empowering families with knowledge about the kinds of skills and experiences that prepare students for examinations as well for future life. To help the parents to understand the broader scope of modern education system.

Programme Highlights:

- Programme conducted in a community based environment where parents felt comfortable and engaged.
- Sessions were scheduled in coordination with residents to ensure maximum participation and minimal disruption to their daily routine.
- Session covered topics on Artificial Intelligence, Online Education, career readiness, life skills, value education, mental health awareness and digital safety.
- Session focused on equipping children for the future by helping parents recognize the skills that matter most in today's world—critical thinking, creativity, communication, and digital literacy.
- Discussed how subjects like Artificial Intelligence and STEM are shaping modern education, along with the benefits of early exposure.
- Highlighted the importance of non-academic development including leadership, emotional well-being and social responsibility.
- Parents were guided on how to support their children's unique learning styles and strengths.
- Awareness Program succeeded in building a strong connection between parents, students and educators.
